Virtual Agents

Microsoft Power Platform allows you to adapt to a changing business environment quickly - analyse data, build solutions, automate processes. It bridges the gap between the data you already have and the solution you need to analyse and visualise the information.

Microsoft PowerApps is a service for creating and using custom business apps across platforms

- Connect to Common Data Model or existing systems/data sources
- Build apps, forms, and workflows without writing code
- Publish apps instantly for web and mobile

Power BI

Make business analytics accessible at all levels of your company to enable data-driven decisions.

Power Apps

Improve business flexibility and help solve business challenges with low code tailored applications.

Power Automate

Drive efficiency by automating repetitive business processes allowing you to focus on generating business value.

- Achieved significant productivity savings.
- Enhanced real-time decision-making with improved data quality.
- Implemented data mart consolidation and developed key financial and operational reports.

Global Fast-Food chain choses Big Data Platform

Region
India

Vertical
Manufacturing

Solution
Big Data

Highlights

- A leading conglomerate and diversified across 20 business and leader in trading, manufacturing & service industries
- Turnover of SAR 1 billion, & 1000+ employees
- Headquartered in Jeddah, locations across Qatar, Bahrain, UAE & MENA region.
- To optimize its existing Data Architecture to accommodate and analyze data generating from various structured & unstructured sources.
- Fast food chain having presence across the globe owning 170+ stores in Saudi Arabia wanted to create a Data Lake solution to process the Data generated from the 700+ POS machines.

Benefits

- Reduced data Processing time
- Reduced Storage Cost in Data lake & ERP
- Managed Hot & Cold Storage for demanding load
- Auto archiving of Old Data
- Realtime integration with ERP for Finance & Inventory Postings
- Ready Power BI Analytics

Large conglomerate adopts Data Strategy

Region
India

Vertical
Manufacturing

Solution
Data Strategy

Highlights

- Large Conglomerate having diversified business having presence across the globe
- Turnover of 4.1-billion-dollar company, & 28000+ employees
- To optimize its existing Data Architecture to accommodate and analyze data generating from various structured & unstructured sources.
- Current On-Premises Data Architecture had limitations to process only Structured Data in batch mode.
- Need of Big-data platform was imminent to collaborate data from various sources.
- Organization has over 50+ enterprise applications and data sources generating data at a scale of approximately 50+ GB on daily basis.

Benefits

- AWS S3 - (Data Landing Area)
- AWS Data Management Services
- AWS EMR - (Spark Data Processing)
- AWS Redshift - (Data warehouse) AWS Glue - (ETL Tool)
